ECO-CÓDIGO 2025/2026
Inglês

Water washes, water gives life,
With it, the Earth becomes

To make sure water won't run out,
You must start saving, there's no doubt.

Fruits and vegetables I will eat,
Because a healthy life is a treat.

We shouldn't waste light needlessly,
So the Planet keeps its quality!

To save our Planet, I must not throw,
Rubbish on the streets where I go.

To help the Planet, we shall recycle,
With help from class 4A, we'll make it vital!

If you want to save the Earth,
Recycling will show its worth!

We must help the environment,
Or the climate will get too hot and turbulent!

We save by using renewable energy,
It's a way to keep our planet's synergy!

I'm learning to save, not to waste away.
Saving is wisdom,
It brings joy every day!

A small action every day,
Builds a citizen in every way.

Sometimes I feel sad, but it soon will pass,
With a hug that hugs, like soft green grass.

Caring for school is caring for
For myself, my garden, big or small.

If you want to save some money,
Don't keep spending, it's not funny!

If you want to breathe clean air,
Plant some trees with love and care.

Let's take care of the forests tall,
To save our planet — one and all!
